Weekly Sprint Planning

Date: October 25th, 2021
Attendees:
- Daniil
- Kshitij
- Jace

1. Learning Activity (Assigned to all team members)
-

2. Plan
- Create a test plugin
- Configure Orthanc database
- Configure Orthanc anonymization
- Research XNAT

3. Q&A

3. Q&A for Dr. Rajapakshe
- A simple GUID in my opinion will not work, too dangerous, must be a single way hash to the anonymized data.
- If we already have a PACS why not query the Kamloops pacs?
- The point of the crosswalk is to notify additional information about the patient, but how will ai researchers know when these new confounding factors are added?

Goals for the next milestone:
1) Complete Orthanc server with receive and anonymization capability
